EMPLOYEE MANAGEMENT

5 · Onboarding

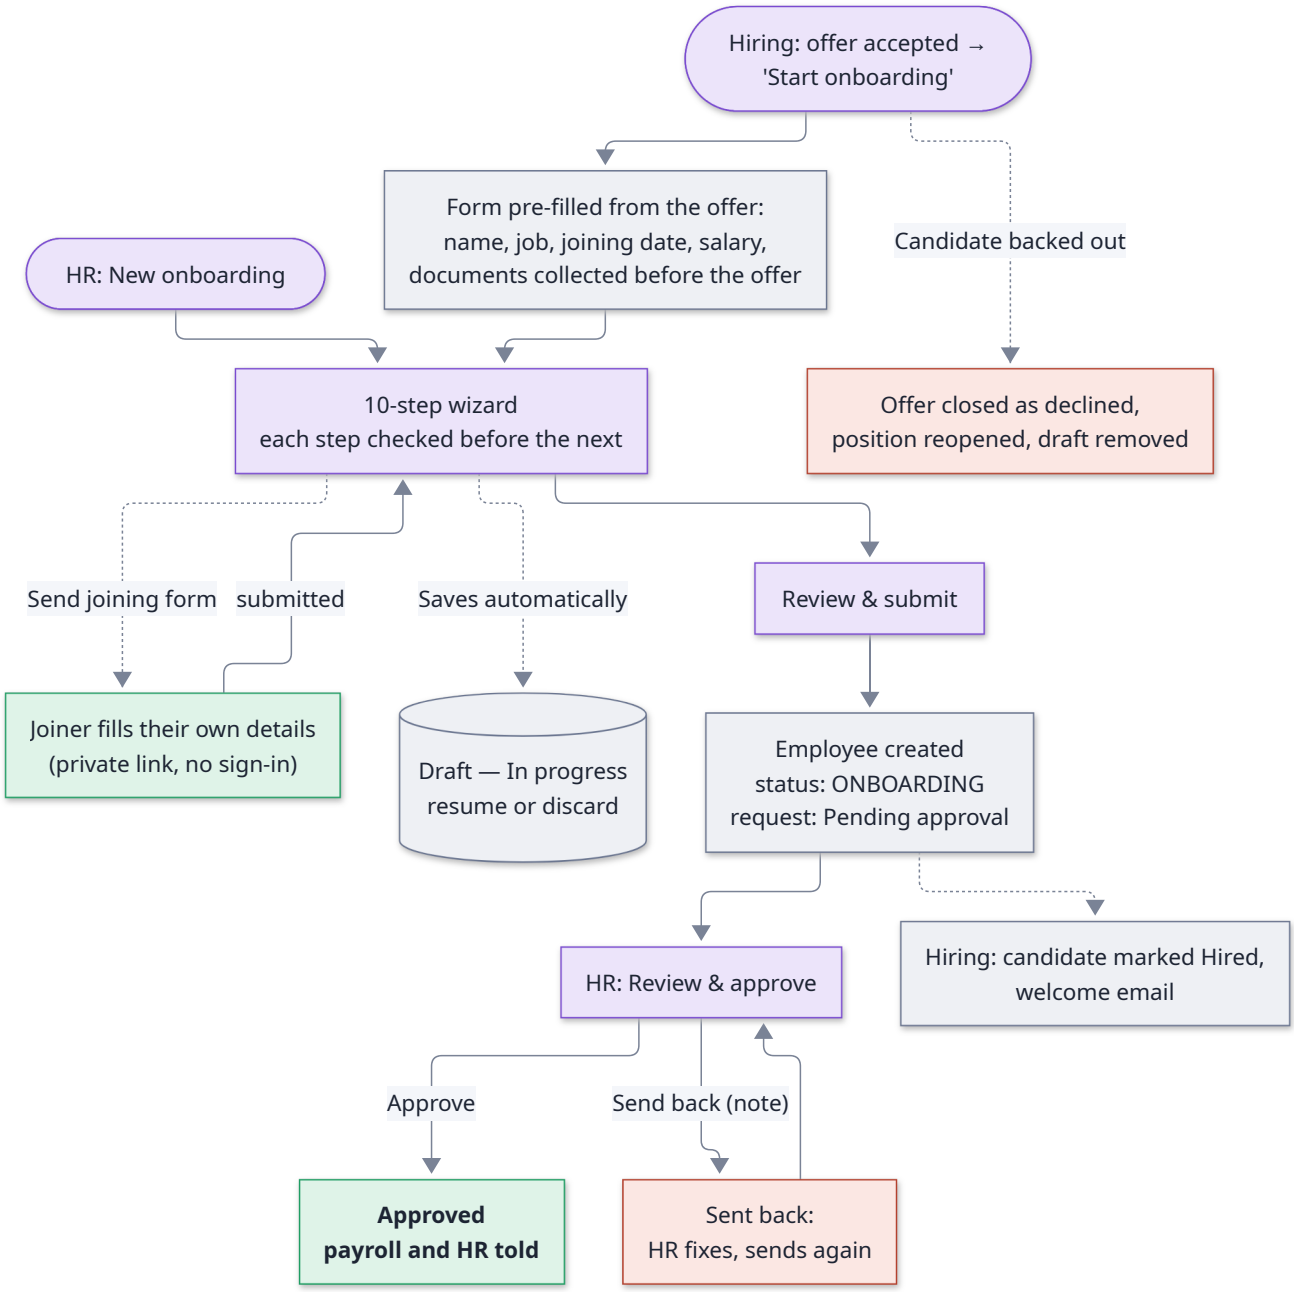

How a new joiner becomes an employee in the system — either typed in by HR or carried over from an accepted job offer, with the joiner filling in their own details through a private joining form.

Used by	HR · Office Admin · Super Admin · joining form by New joiner · approval by HR
Frontend	`/onboarding` (list + 10-step wizard), `/onboarding?hire=<offerId>`, `/onboarding/form/[token]` (joining form, no sign-in), `lib/hiringHandoff.ts`, `lib/onboardingForms.ts`, `lib/payroll.ts`, `lib/workflow.ts`
Backend	Phase 1

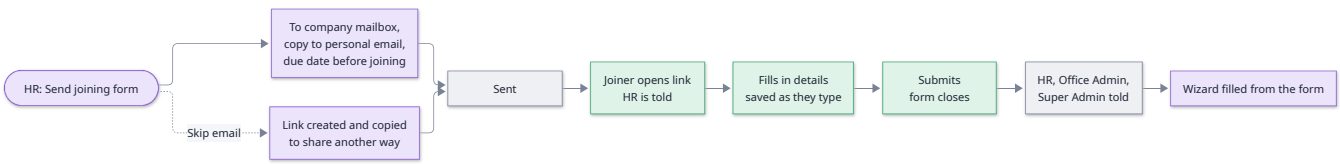

In short

1. HR starts an onboarding by hand or from an **accepted job offer**, which fills most of the form.
2. HR can send the joiner a private **joining form** link; the joiner fills in their personal, identity, bank and family details, and the wizard is filled from it.
3. The wizard **saves automatically**; unfinished onboardings appear under *In progress* and can be resumed or discarded.
4. On submit the employee is created with status **Onboarding**. HR then **approves** it or **sends it back** with a note.
5. After approval, payroll is told to set up the salary.

The flow

The joining form

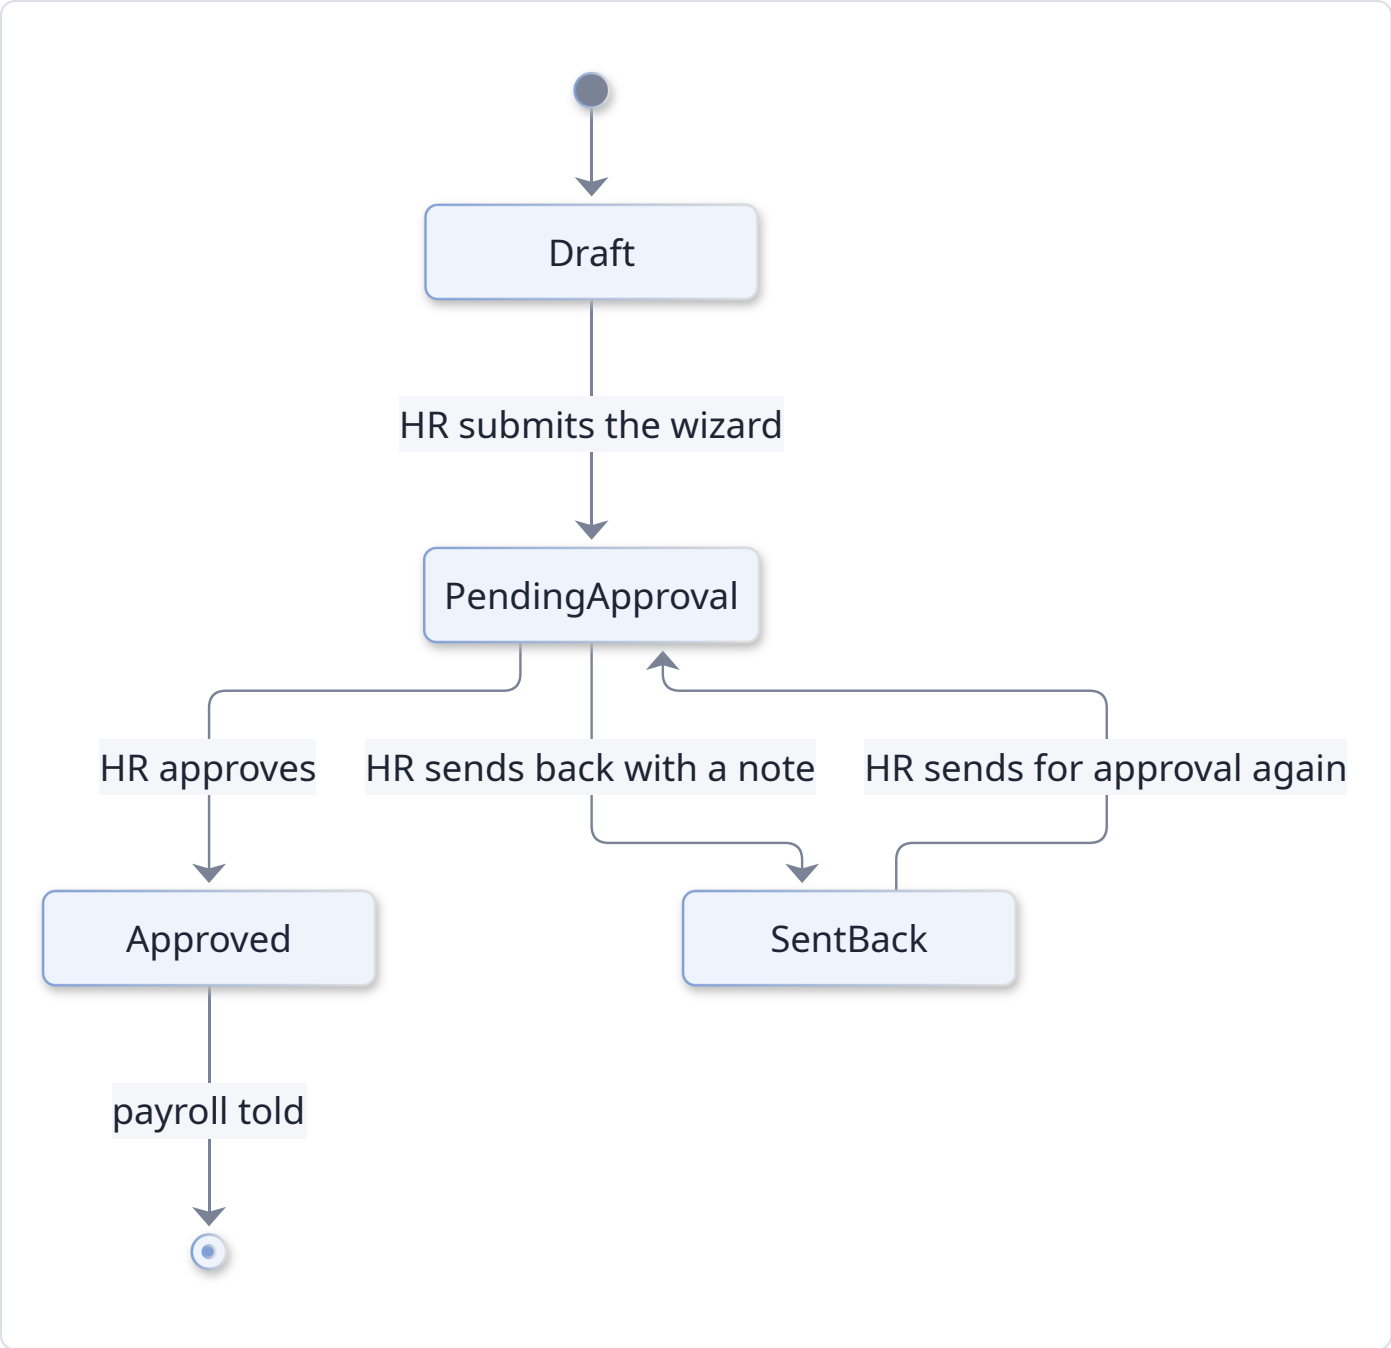

- One form per joiner. Sending again keeps the same link and what they already typed.

- The joiner must give names, date of birth, nationality, contacts, address, identity numbers, bank details (account number typed twice), PF for Kochi, one emergency contact, a passport-size photo, and tick the declaration.
- Documents HR already collected before the offer letter are not asked for again.
- The email uses the *Joining form* template under Hiring → Operations → Email templates.

The 10 steps

#	Step	Dubai	Kochi
1	Personal	Full name (as per passport), gender, date of birth, nationality, contact, addresses	Same, plus first / middle / last name
2	Employment	Company → department → designation (filtered by company and location), manager, joining date, type, system role. Probation ends 6 months after joining. Suggested work email `firstname@gs-it.ae`	
3	Identity	Passport (required), visa, Emirates ID, labour card	Passport (optional), Aadhaar + name as per Aadhaar, PAN + name as per PAN
4	Emergency contacts	Local (UAE) + home country	Primary + alternate
5	Experience & education	Previous jobs and qualifications, each with an optional letter or certificate	
6	Family	Name, relationship, occupation, date of birth	
7	Bank & PF	IBAN (checked), WPS / bank transfer	Account (typed twice) + IFSC + branch name; PF: already enrolled? → UAN and its linked mobile, previous PF member ID, EPS eligibility
8	Salary	Basic, transport, accommodation. Shows unemployment insurance, pension for UAE nationals (11 % deducted) and gratuity	Basic, HRA, allowances. Works out EPF, ESI, professional tax (deducted), employer PF / pension / ESI, gratuity and monthly CTC
9	Documents	Required documents for the country, with expiry dates, optional details (passport / Aadhaar numbers, certificate) and reminder settings (90/60/30/7 days; employee, HR, manager)	
10	Assets & approval	Laptop, monitor, phone, access card, SIM, headset, software licence — then submit	

Approval

HR, Office Admin or Super Admin opens **Review & approve**, sees who is joining (code, role, position, location, joining date, work email) and approves — or sends it back, which needs a note on what to fix. Both decisions are recorded in the audit log.

UAE visa tracker (Dubai hires)

While the visa is being processed, HR ticks off **20 stages in 5 groups**: Preparation & documents → Work permit (MOHRE) → Entry permit (GDRFA) → Medical & insurance → Emirates ID & residence.

When the hire comes from Hiring

- Salary lines are matched: Housing → Accommodation, Transport → Transportation. Kochi offers are yearly, so amounts are divided by 12.

- Employment type: Full-time → Permanent, Contract → Contract, Intern → Probation.
- The offer must be **Accepted** and not already used for an employee.
- Documents collected and verified before the offer letter, and the background-verification referral, are shown so nobody asks for them again.
- If the candidate backs out after accepting, HR closes the offer as declined with a reason; the position reopens.

> **Not in the frontend yet — decisions needed**
>
> - Approval is a single HR step. The *Manager review* in the configured chain is shown but not enforced, and approval does not move the joiner from **Onboarding** to **Active**. The lead must confirm the chain.
> - Nothing stops the HR user who submitted an onboarding from approving it.
> - The joining-form link never expires and the due date is not enforced — the backend must expire it.
> - Statutory salary figures are indicative; payroll must confirm the rates before the first pay run.
> - The visa tracker, asset choices and reminder settings live only in the draft and are never saved to the employee.
> - Uploaded files (wizard and joining form) are recorded by name only.
